

## Carton Flow Rack

Carton flow rack is designed for first-in, first-out (FIFO) inventory management.

Rack supports inclined rollers or wheels that allow cartons to glide from the back (loading) aisle to the front (picking) aisle. Brakes can be included for speed control. These gravity systems provide excellent volume utilization. Carton flow can be configured in many different ways, such as a stand-alone system, integrated with various pallet rack types, or within a multi-level pick module.

Carton flow rack provides constant inventory rotation so this system is ideal for storing materials with materials that vary in size, expiration dates, food and beverage applications and cold storage. Carton flow rack allows products to be continuously available to pickers, which increases productivity and provides high volume case-pick and piece-pick applications.

### Carton Flow Rack Product Flow

Cartons are loaded from the back of the system and glide to the front for picking. When the front carton is unloaded, the next automatically glides into picking position.

### Carton Flow Rack Specifications and Options

#### Frame Types:

- Roll formed
- Structural

#### Accessories:

- Lane guides

- Tilt trays: located at the discharge end of the system to allow for easy access into the top of a case or tote for piece-picking.

**Options:**

- Full bed polycarbonate wheels for varying carton widths
- Full width steel rollers and polycarbonate wheels for consistent carton widths

**Complete Rack System Products and Services**

REB Storage Systems International can provide you with products to complete your material handling system, including decking, shelving, and mezzanines.

At REB Storage Systems International, we combine our superior selection of quality products with professional, first-rate service. We will gladly assist you with selecting the right options for your particular needs and can provide additional support to help you complete your project. From rack system engineering to rack installation, we can help with all of the needs of your material handling operations.

**Now that you have a better understanding of carton flow rack, we'd appreciate the opportunity to help you with the next step in your research, whether that be more information or a quote request.**

**Email [info@rebstorage.com](mailto:info@rebstorage.com) or call 800-252-0400 to give us a better idea of your needs.**
