

Push Back Rack

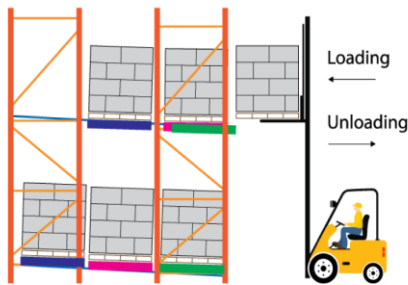

Push back rack is designed for last-in, first-out (LIFO) inventory management.

Rack supports carts that move along inclined rails. Push back systems utilize the warehouse cube to reduce required aisle space and maximize product storage, making it a high-density pallet storage solution. A variety of layout configurations are available with variable bay widths to accommodate single-wide or double-wide pallet rows.

Since push back systems maximize product storage, they are ideal for spaces that require a higher density solution such as freezer and cooler environments. Push back rack allows access to multiple groups of SKUs simultaneously to accommodate warehouses or distribution centers that house a variety of products.

Push Back Product Flow

Each pallet is loaded from the front of the system on to a cart. Using the next pallet, the first is slowly pushed until it is aligned with the next available cart. When the front pallet is unloaded, the next pallet glides to the front for picking.

Specifications and Options

Rack Support Structure Types:

- Roll formed frames and beams
- Structural channel frames and beams

System Depth:

- 2 pallets to 6 pallets deep

System Height:

- Commonly up to 4 levels high, more depending on retrieval method

Assembly:

- Floor-mounted for maximum vertical storage

Cart Assemblies:

- Low profile stack height for maximized vertical storage
- Channel track assembly for high strength and durability
- Sealed bearings for all wheels to maintain flow performance

Accessory Options:

- Cart covers
- Welded Struts to accept wire decks

Complete Rack System Products and Services

REB Storage Systems International can provide you with products to complete your material handling system, including decking, shelving, and mezzanines.

At REB Storage Systems International, we combine our superior selection of quality products with professional, first-rate service. We will gladly assist you with selecting the right options for your particular needs and can provide additional support to help you complete your project. From rack system engineering to rack installation, we can help with all of the needs of your material handling operations.

Now that you have a better understanding of push back rack, we'd appreciate the opportunity to help you with the next step in your research, whether that be more information or a quote request.

Email info@rebstorage.com or call 800-252-0400 to give us a better idea of your needs.
