

Selective Pallet Rack

Selective pallet rack is designed for first-in, first-out (FIFO) inventory management.

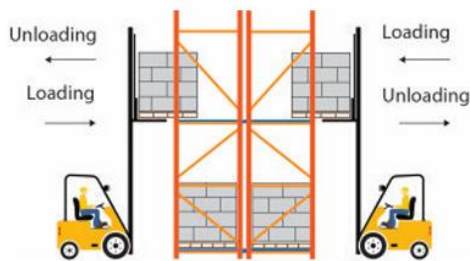

Selective rack is the most common type of racking system because it enables direct access to all stored pallets or cartons without the need to move others. This makes it a highly selective solution where it is necessary to have a wide variety of products stored.

The direct access to products makes selective rack ideal for warehouses or distribution centers with continuous product circulation or that require access to all pallets simultaneously. The high selectivity does require numerous aisles, making it a lower density option compared to other racking systems.

Double-deep, or two pallet deep, selective rack is also available for a LIFO inventory management option.

Product Flow

Pallets are loaded and unloaded from the front in selective pallet rack systems.

Pallets are loaded and unloaded from the front in selective pallet rack systems.

Specifications and Options

ROLL FORMED SELECTIVE PALLET RACK

Frame Types:

- 3" and 4" wide column sections
- Open column design
- Steel gauge of 16ga – 10ga
- Welded column reinforcements

- Standard or oversized base plates
- Tear drop punch in 2" vertical increments for a "boltless" beam connection

Beam Types:

- Roll formed step beams with 1.625" interior step
- Step beams have 3-pin and 4-pin end connectors for 2" vertical adjustability

Accessories:

- Row spacers and wall ties
- Pallet cross bars (inserted or waterfall)
- Frame guards (welded, bolt-on, and floor mount)

STRUCTURAL SELECTIVE

PALLET RACK

Frame Types:

- 3" and 4" wide channel, light & heavy duty
- Welded column reinforcements
- Standard or oversized base plates
- Bolted punch for channel frames on 4" vertical increment

Beam Types:

- Bolted Channel: 3" through 8" channel
- Out-facing channel beam with an angle welded to the inside to create a 1.625" inside step for wire decks.
- Channel beams manufactured with a 2-bolt, 4-hole x 8" end connector. End connector design for 2" vertical adjustability.

Accessories:

- Row spacers and wall ties
- Bolted cross bars
- Frame guards: welded, bolt-on, and floor mount

Complete Rack System Products and Services

REB Storage Systems International can provide you with products to complete your material handling system, including decking, shelving, and mezzanines.

At REB Storage Systems International, we combine our superior selection of quality products with professional, first-rate service. We will gladly assist you with selecting the right options for your particular needs and can provide additional support to help you complete your project. From rack system engineering to rack installation, we can help with all of the needs of your material handling operations.

Now that you have a better understanding of selective rack, we'd appreciate the opportunity to help you with the next step in your research, whether that be more information or a quote request.

Email info@rebstorage.com or call 800-252-0400 to give us a better idea of your needs.
