

SpeedCell can condense 200 ft. of racking or shelving into 40 ft. of high-density storage by utilizing unused flue space within your racks.

SpeedCell maximizes your warehouse space using high-strength columns that are suspended within your existing selective rack or wide span rack systems. This allows the columns to hang and easily move from side to side for higher accessibility to rear columns.

The columns provide higher selectivity, which allow for more pick facings and greater SKU density while significantly reducing travel and picking times.

Read below to learn SpeedCell features, specifications, and typical applications. If you'd like to speak with a representative regarding SpeedCell, fill in the contact form on this page or call (800)252-5955.

SpeedCell Features

Designed to fit any beam type, a galvanized steel track system is configured into your existing storage system and allows the columns to hang and easily move from side to side for higher accessibility to rear columns.

- Built-in label holders
- Fire, mold, and rust resistant material
- Up to three (3) columns deep and twelve (12) columns wide per 144" bay
- Operates in temperatures from -20 to 180 degrees Fahrenheit
- Fits any type of beam
- Easy installation

Specifications

SpeedCell is completely customizable and the columns can be tailored to your unique inventory requirements. An array of sizes and configurations are available to increase your picking speeds and boost productivity.

Standard specifications include:

- Weight:-----13 oz
- Capacity per column:----240 lb
- Capacity per cell:-----35 lb
- Widths:-----12", 18", 24"
- Depths:-----12", 19"
- Cells per column:-----4 – 12
- Available Colors:-----White and gray

Typical Applications

SpeedCell can be outfitted for dynamic or static storage use. Multiple columns can be installed to make full use of your system's depth, giving you multiple pick facings for higher storage density. The added density is ideal for warehouses or distribution centers with high product circulation and that require storage of multiple SKUs.

- E-commerce
- Retail
- 3PL
- Distribution centers

SpeedCartt Mobile Storage

SpeedCartt is a mobile picking cart solution that offers greater SKU availability than bins or cartons. The SpeedCartt can expedite order fulfillment, restocking, and seasonal demands.

Similar to SpeedCell, the SpeedCartt is a suspended storage option that provides more pick facings and greater density with fewer travel times. This mobile option is ideal for environments where products have high circulation.

Standard specifications include:

- High-strength, non-fraying fabric columns
- Fire, mold, and rust resistant material
- Operates in temperatures from -20 to 180 degrees Fahrenheit
- Customizable cell features

Do You Need A Storage Solution?

If you are looking for a unique way to add more storage density and selectivity, we can help. Designed to fit any beam type, for any application, SpeedCell can dramatically increase your storage density and add more pick facings within a bay of rack.

We'd appreciate the opportunity to help you further, whether that be more information or a quote.
